## ANNOUNCEMENTS

### MULTIPLE STAR CATALOG (MSC) HAS A NEW ON-LINE INTERFACE

<http://www.ctio.noao.edu/atokovin/stars/index.php>

As of August 2005, MSC contains 1024 physical systems of multiplicity from 3 to 6. It is expected that the on-line version will be updated regularly. Please, send corrections or information on the new systems to A. Tokovinin, [atokovinin@ctio.noao.edu](mailto:atokovinin@ctio.noao.edu).

Andrei Tokovinin  
Cerro Tololo Inter-American Observatory

### IAU SYMPOSIUM 240

We are proud to announce IAU Symposium 240, “Binary Stars as Critical Tools & Tests in Contemporary Astrophysics”, to be held 22-25 August 2006, during the International Astronomical Union’s 26th General Assembly in Prague, Czech Republic.

We believe this is the first major meeting in recent memory bringing together members of both the “wide” and “close” binary communities; it is therefore appropriate that the meeting be co-sponsored by Commissions 26 (Double and Multiple Stars) and 42 (Close Binary Stars) with the support of 11 other commissions and working groups.

Topics to be included range from common proper motion pairs and other “fragile” binaries to contact binaries and star/brown-dwarf and star/planet systems, from long-baseline interferometry to theories of binary formation and anticipated results of Gaia and other large-scale surveys. Our goal is to have a meeting which will appeal to all binary and multiple star researchers, where astronomers in different binary star field may find areas of common interest.

Please see the symposium website, <http://ad.usno.navy.mil/iaus240/>, for a preliminary program and other information concerning this meeting.

William Hartkopf, Petr Harmanec and Ed Guinan  
Symposium 240 co-chairs
